

## **OVERVIEW**

This document reviews the significant enhancements to DentaLab for QuickBooks (DQB) in 2009 Release XX-000 in October based on requests and suggestions from users of the system as well as the technical support staff. Here is a summary list:

### **Windows 7**

- Microsoft Windows 7 will be released to the general public on the same date as DQB Release XX-000 (also known as 1.20). DQB has been reviewed for all major functions to comply with Windows 7.

### **Ship Cases – Edit Case**

- From the ship cases screen, you can right-click on any case in the grid to do a final edit before shipping.
- Designed to save steps and time when shipping a batch of cases

### **Invoicing - New Suffix for Multiples**

- For the first invoice created for a DQB case, the invoice number will consist of the case number plus the suffix (designated in Options/Settings), sample 1234DL. For subsequent invoices from the same case, letters of the alphabet will be appended, eg. 1234DLA, then 1234DLB, 1234DLC, continuing through Z

### **Invoicing – Error Reporting**

- Error reporting has been extended to show actual error message from IBiz connector between DQB and QB with assurance that the process window will always be closed upon connection error.

### **Standard Procedures – Coordination with DRX**

- In each standard procedure, there is now a checkbox to indicate whether it is to be made available to DentalRx (DRX) for online prescriptions from the dental offices.

### **Vendors – Notes Field Expanded**

- The Notes field for the Vendors has been expanded to 4096 characters to match the field length in QuickBooks.
